

ATF
AGRO TECH FARM

WHITE PAPER

HOME APPLIANCES FOR THE CULTIVATION
OF VARIOUS CROPS ALL YEAR ROUND

IMPORTANT NOTICE

Please read this and following sections, i. e: Disclaimer, company's commitments and warranties, commitments and warranties for the clients, warning of forward-looking statements, market and industry information, terms and definitions, information disclosure restrictions, risks and uncertainties, carefully.

If you have any doubts about the actions you have to take, please consult your legal, financial, tax and other professional advisors.

ATF tokens are not securities in any jurisdiction. This White Paper is not a prospectus or offer of any kind and is not intended to offer securities or investments in securities in any jurisdiction.

This document is not part of anyone's opinion or any advice to buy an ATF token or any part thereof.

No person is required to enter into any contract or binding legal obligation with respect to the tokens sale and purchase and no crypto-currency or other form of payment is accepted hereunder.

No regulatory body has reviewed or approved the information set out herein. No such actions have been taken or will be taken under the laws, regulations and statutory acts of any jurisdiction. Publication, placement or distribution of this document does not imply the compliance with applicable laws, rules or regulations.

There are risks and uncertainties associated with the company's activities and their respective enterprises and transactions, payment tokens, ATF Sale initial token and ATF purse (each mentioned herein).

It is prohibited to accept or transmit this document, any part thereof and/or any copies thereof in any country where the distribution of this document or any part thereof is prohibited or restricted.

No part of this document will be reproduced, distributed or placed without this section and the following sections: DISCLAIMER, COMPANY'S COMMITMENTS AND WARRANTIES, COMMITMENTS AND WARRANTIES FOR THE CLIENTS, WARNING OF FORWARD-LOOKING STATEMENTS, MARKET AND INDUSTRY INFORMATION, TERMS AND DEFINITIONS, INFORMATION DISCLOSURE RESTRICTIONS, RISKS AND UNCERTAINTIES.

DISCLAIMER

To the maximum extent permitted by applicable laws and regulations, the company shall not be liable for any indirect, special, incidental or other damages of any kind, contract-related offenses or otherwise (including but not limited to loss of revenue, income or profit when using or storing data).

COMPANY'S COMMITMENTS & WARRANTIES

The company shall not intend to, and hereby waives any representations, warranties or commitments in any form made in respect to any legal entity or individual, including any representations, warranties or commitments regarding the truth, accuracy and completeness of any information herein.

You should know that you may be required to bear the financial risk of any payment tokens purchase for an indefinite period of time.

COMMITMENTS & WARRANTIES FOR CLIENTS

Getting access to and/or accepting any information contained herein or a part thereof (as the case may be), you warrant ATF as follows:

(a) You agree and acknowledge hereby that payment tokens are not securities in any form in any jurisdiction;

(b) You agree and acknowledge hereby that this document is not a prospectus or offer of any kind and is not intended to be a securities offer in any jurisdiction or an application to invest in securities; that you are not required to enter into any contract or a binding legal obligation; and that no crypto-currency or other form of payment should be accepted hereunder;

(c) You agree and acknowledge hereby that no regulatory body has reviewed or approved the information contained herein, no actions has been taken or will be taken in accordance with the laws, regulations or rules of any jurisdiction and that the publication and distribution hereof to you do not mean the compliance with the applicable laws, regulations or rules;

(d) You agree and acknowledge hereby that this document, the enterprise and / or the representations of ATF about tokens / sales or future trade for tokens / exchange for any crypto-currency shall not be construed, interpreted or regarded by you as a sign of Ponzi game;

(e) The transmission / distribution or acceptance by you of this document (any part or any copy thereof) is not prohibited or restricted by the applicable law, rules or regulations in your country; and where any ownership restrictions are not applicable, you observed and complied with all restrictions at your own expense and without obligations to ATF;

(f) You agree and acknowledge hereby that if you wish to purchase any payment tokens, such payment tokens should not be construed, interpreted, classified or treated as:

1. Any other type of currency other than crypto-currency;
2. Debt obligations, shares or stocks issued by any individual or legal entity (whether it is a ATF);
3. Rights, options or derivative financial instruments with respect to such debt obligations and/ or shares;
4. Contractual rights to the price difference or rights under any other contract aimed at ensuring profit or avoiding losses;
5. In units of a collective investment scheme;
6. Any other security or class of securities.

(g) You are fully aware and understand that you are not entitled to purchase any payment tokens if you are a citizen, resident (tax or otherwise) or the United States of America green card owner or a citizen or resident of the Republic of Singapore;

(h) You have a basic understanding of the operation, functional capability, use, storage, transfer mechanisms and other characteristics of the crypto-currency material, software system blockchain, crypto-currency purses or other mechanisms associated with storing tokens, blockchain technology and smart contract technology;

(i) You are fully aware and understand that in the event that you wish to purchase tokens, there are risks associated with ATF and their commercial activities and transactions;

(j) You agree and acknowledge hereby that ATF are liable for any indirect, special, incidental or other losses of any kind related to an offense, contract or otherwise (including but not limited to loss of revenue, income or profit, loss of use or data);

(k) All of the foregoing representations and warranties are true, complete, accurate and not contrary to the facts upon your access to and / or acceptance by you of this document or a part thereof (as the case may be).

WARNING OF FORWARD-LOOKING STATEMENTS

All representations contained herein, statements made in press releases or any other public place, as well as any oral statements that may be made by ATF or their respective directors, executive officers or employees acting on behalf of ATF, which are not statements of historical evidence, shall constitute “information exchange statements”. Some of such statements can be defined by such forward-looking terms as “goal”, “anticipate”, “believe”, “could”, “evaluate”, “expect”, “if”, “intend”, “can”, “plan”, “possibly”, “project”, “should”, “will” or other similar terms.

However, these terms are not an exclusive means to determine forward-looking representations. All representations regarding the financial position of the ATF, business strategies, plans and prospects, as well as future prospects for ATF industry are forward-looking statements. Such forward-looking statements, including but not limited to statements of revenue and profitability of ATF, prospects, future plans, other expected industry trends and other issues discussed in this White Paper regarding ATF, are not historical facts but just predictions.

Such forward-looking statements anticipate known and unknown risks, uncertainties and other factors that could cause the actual future results, outcomes and achievements of ATF to be significantly different from any future results, outcomes or achievements expected, expressed or implied by such forward-looking statements.

Such factors include, among others:

- (a) Changes in the political, social, economic, stock or crypto-currency market regulatory environment in the countries where ATF transact or operate, respectively;
- (b) The risk that ATF will not be able to meet their respective business strategies and future plans;
- (c) Changes in interest rates and currency exchange rates of fiat currency and cryptocurrency;
- (d) Changes in the expected growth strategies and the expected internal growth of ATF;
- (e) Changes in ATF companies due to their respective businesses and transactions;
- (f) Changes in the availability of employees and salaries of employees who should ensure the operation of their enterprises and their transactions under a contract with ATF;
- (g) Changes in the preferences of ATF consumers;
- (h) Changes in market conditions of ATF operation and the ability of ATF to be competitive in such conditions;
- (i) Changes in future capital needs in ATF tokens and the availability of financial resources and capital to finance such needs;
- (j) Wars or acts of international and domestic terrorism;
- (k) Catastrophic events, natural disasters and acts of God that affect the business and / or operations of ATF;
- (l) Other factors beyond the control of ATF;
- (m) Any risks and uncertainties associated with ATF, their business and transactions, for tokens.

All forward-looking statements made by ATF or persons acting on behalf of ATF are directly qualified in full by such factors. Considering that the risks and uncertainties that may lead to actual future results or achievements of ATF significantly differ from those anticipated, expressed or implied by the forward-looking statements provided in this White Paper, such statements shall not be relied upon. These forward-looking statements are applicable only as of the date of submission hereof.

Neither ATF nor any other person represents, guarantees and/ or undertakes that the actual future results, outcomes or achievements of ATF will be discussed in such forward-looking statements. Actual results, performance or achievements of ATF may significantly differ from those anticipated in these forward-looking statements and actual ones.

Nothing herein is or can be used as a promise, representation or undertaking regarding future activities or policies of ATF.

Moreover, ATF disclaim the liability for the updating of any of these forwarding-related statements related to the transfer or publicly announce any changes in such statements reflecting future happenings, events or circumstances, even if new information becomes available or other events take place in the future.

MARKET & INDUSTRY INFORMATION

This document includes market and industry information and forecasts obtained through internal reviews, reports and studies, where appropriate, as well as from market research, public information and industry publications. Such reviews, reports, studies, market research, public information and publications commonly indicate that the information contained therein has been obtained from sources deemed reliable but there can be no guarantee of the accuracy or completeness of such included information.

Although ATF have taken reasonable steps to ensure the accurate extraction of information and the proper context thereof, ATF conducted no independent analysis of information extracted from third-party sources, did not verify the accuracy or completeness of such information or did not establish underlying economic assumptions, which were relied on. Therefore, neither the ATF neither respective directors, executive officers and employees acting on their behalf make any representations or warranties regarding the accuracy or completeness of such information and are not required to update the same.

TERMS & DEFINITIONS

To better understand the payment tokens offered by the ATF for purchase, certain technical terms and abbreviations (or descriptions thereof in some cases) have been used herein. These descriptions and their assigned meanings should not be considered as defined ones and may not correspond to standard industry meanings or usage.

Where applicable, words used in the singular include the plural and vice versa; words in masculine gender, where applicable, include the feminine and neutral gender and vice versa. Reference to persons includes corporations.

INFORMATION DISCLOSURE RESTRICTIONS

The distribution of this document or a part thereof may be prohibited or restricted by laws, regulations and rules of any jurisdiction. In the event that any restrictions apply, you must inform yourself of any restrictions that apply to your ownership of this document or a party thereof (as the case may be) at your own expense and with no liability to ATF.

Persons who are granted access to this document or who otherwise have a document in their possession should not distribute it to any third parties, reproduce or otherwise distribute this document or any information contained therein for whatever purpose as well as to allow or lead to the same.

There is no offer of securities or registration.

This White Paper is not a prospectus or offer of any kind and is not intended to offer securities or investments in securities in any jurisdiction. No person is required to enter into any contract or binding legal obligation and no crypto-currency or other form of payment is accepted hereunder. Any agreement regarding any sale and purchase of payment tokens (as specified herein) is governed only by this White Paper.

You are not allowed to purchase any ATF tokens at the initial sale of tokens (as specified herein) if you are a citizen, resident (tax or otherwise) or a greencard holder of the United States of America or a citizen or resident of the Republic of Singapore.

No regulatory body has reviewed or approved the information set out herein. No such actions have been taken or will be taken under the laws, regulations or rules of any jurisdiction. Publication, dissemination or distribution of this document does not imply the compliance with applicable laws, rules or regulations.

RISKS & UNCERTAINTIES

The potential tokens buyers (as specified herein) should carefully consider and assess all risks and uncertainties associated with ATF, in dealing with tokens. If any such risks and uncertainties escalate into actual events, then ATF business, financial condition, results of operations and prospects may be materially and adversely affected. In such cases, you can lose all or part of the tokens value.

WE DO NOT PROMOTE NARCOTIC SUBSTANCES, AND CATEGORICALLY OPPOSE THEIR USE. SOME HERBS ARE CONSIDERED A SCHEDULE AS CONTROLLED SUBSTANCE UNDER THE FEDERAL LAWS IN DIFFERENT STATES, AND, THEREFORE, THE POSSESSION, CULTIVATION AND DISTRIBUTION THEREOF IS FEDERALLY ILLEGAL AND CAN RESULT IN SIGNIFICANT CRIMINAL AND CIVIL PENALTIES. ANY HERBS YOU SELECTED TO CULTIVATE WITH SUPPORT OF ATF APPLIANCE IS AT OWN CUSTOMER'S RISK.

Abstract

The aim of the project is to initiate the mass production of indoor ATF home farming appliances for north american customers. ATF farms secure the automated growth of cannabis, tomatoes, cucumbers and many more plants. This reaps the full benefits of LED lighting for growing and hydroponics technologies¹. ATF indoor appliances need minimal customer involvement during the vegetation process and don't require any specific knowledge in agronomy or advanced experience. Thanks to a proper temperature regime and relative humidity, average yields for indoor farming are higher than similar typical crops grown outdoor.

Current Business

The founders have formed the ATF team, which specializes in vertical indoor farming solutions. Most of our agronomists and engineers are former employees of the company Agronomof, the first russian agro holding, pioneer of vertical farming in Russia that ran under the FIBONACCI brand. After Agronomof's closure, these kept researching in the vertical farming field, carrying on the solid R&D activities related to vertical farming based on the combination of hydroponics and LED lighting.

The current company was officially registered in Yekaterinburg, Russia, in 2016. With the launch of the first industrial vertical farms in Russia, the company's focus since has been on providing a state-of-the-art indoor farming solution for strawberry cultivation, revolutionizing the industry in Russia.

The business is about to expand globally, focusing on the US & Canada, looking to make the most of the cannabis market's enormous potential for growth².

2 <http://www.businessinsider.com/legal-weed-market-to-hit-10-billion-in-sales-report-says-2017-12>

PRODUCT

The ATF Home Grower is a unique cultivation device, designed for the easy home cultivation of cannabis and all sorts of herbs, fruits and vegetables. Unlike other types of growers, ATF home farm does not require professional agronomic skills or specific knowledge regarding vegetation process. All operations related to photosynthesis are pre-programmed and fully automated. Users can effortlessly control and monitor cultivation cycles with their smartphone or tablet, making the cultivation experience almost game-like.

There are two different versions of the ATF Home Grower. The ATF Home Grower “Strawberry” and the AT Home Grower “Cannabis”.

ATF Home Grower “Cannabis”

The ATF Home Grower large, having similar functionality, displays some modifications. Foregoing the levels, it can house 2 plants in two vegetation cells, and allow much taller stems (up to 140 cm). This makes it ideal for Cannabis, tomatoes or cucumbers.

ATF Home Grower “Strawberry”

As the name indicates, this version of the Grower lets you grow smaller vegetables and fruits like strawberries. One can grow up to three different kinds of plants at the same time in three different levels. Each holds 4 growing pods, meaning you could grow 12 strawberry plants, or a three-plant variety.

The grower allows everyone access to almost daily fresh produce, organic and ready for consumption, all year round.

The device also includes a climate control system. This allows for fast fruitful vegetation.

The high functionality of both versions of the product, both are also stylishly designed. Its sleek, minimalistic and modern look allows the Grower to be incorporated into any interior. You won't want to hide it away at a garage, but show it as part of a dispensary, kitchen, or living room.

Growth is soil-free. This eliminates the risk of diseases or pests. No weeding or special monitoring is needed. Average yields are up to 30% higher due to an efficiently programmed water supply, a proper lighting spectrum, an intelligently fixed amount of "sunny" hours and the optimal use of nutrients.

The impressive features of ATF home appliances are listed below:

- Fully automated vegetation processes.
- Imitation of natural lighting.
- Automated microclimate (temperature and humidity).
- Automated watering and nutrition.
- Che free. No pesticides.
- Higher yields than traditional agriculture.
- A short-term vegetation cycle. Up to 30 % faster than normal.
- No weeding required.
- Low maintenance cost.
- iOS and Android Mobile App controls.
- Stunning design.
- Easy-to-use.
- 24 month manufacturer warranty.
- Canadian made.

Please bear in mind that some herbs and plants are treated as controlled substances under law in different states. This may make their possession, cultivation and distribution illegal, resulting in grave criminal and civil penalties. Cultivation of any plant using the ATF appliance is fully under the customer's responsibility and risk. ATF does not encourage the commission of any crime.

Competitors

AgroTechFarm has successfully submitted the application for a patent in Canada and Russia. The company, its team and the product have accumulated years of research. Fully aware of competition in the north american markets, ATF and its customers can trust our proven technological superiority.

There are only three competing hydroponics-based systems , one of which is not suitable for Cannabis cultivation. Yet, none of these three competitors are currently available in north america. This makes it a blue ocean. Further, competitors' systems have not yet been made available because the technology is simply not ready for market, with many issues still to be solved.

Finally, these competitors do not focus on the Canadian market. These facts make for a huge opportunity of deploying our well tested product in a big marketm taking a strong lead in terms of market share.

As the ATF Home Grower prototype has been already developed and tested, we are currently raising funds to launch the second phase of our project. This is the mass production and distribution of the ATF home appliances. We are conducting this ICO in order to launch our own production facilities in Canada and produce and sell ATF Home Growers in North America.

Tokens are created with an ERC20 token smart contract. Tokens will be minted only on purchase.

The pre-ICO campaign will start on February 16, 2018 and will last until April 10, 2018. The maximum number of tokens is limited to a hard cap of 500 ETH in the presale. The collected funds will be used for marketing and preparation of the ICO.

The ICO campaign will start on April 10 and will last until June 10, 2018. The maximum number of tokens for the ICO is limited to a Hard Cap of maximum 10 000 ETH. In the main ICO the purchaser will have the right to a refund if we do not reach the Soft Cap of minimum of \$1,300,000. The project will be suspended, for it would mean that the interest industry is low and the working capital would not be enough.

In the main ICO, 15% of the sold ATF tokens will be generated for team members (6% tokens), marketing and advisors during the ICO (7% tokens) and a large bounty program (2% of tokens). The additional ATF tokens will be added to a separate account for team and bounty.

In total, no more than 1.431.000 ATF tokens can be issued.

- 65% are distributed to investors during the pre-ICO and ICO

- 10% partnetships

- 10% treasury

- 7% marketing and advisors

- 6% are paid to project team members

- 2% bounty campaign

ATF tokens allocated for the bounty campaign participants will be transferred within two weeks after the end of ICO. Individual ATF token holders have the right to use them freely and as they see fit.

During the crowd sale, we will only accept Ethereum (ETH). We expect our project of brand new ATF indoor farms for Cannabis and plants cultivation to be appealing for the members of the crypto-community, who will be able to participate in the market growth with their investments, as well as for potential cannabis consumers.

TECHNOLOGY

The ATF indoor technology is based on hydroponics and advanced LED lighting. Hydroponics is a soil-free cultivation technique. Hydroponic systems are ideal for the commercial grower, as they are highly efficient and require low capital, while producing higher yields with less labor input.

The same advantages apply to the ATF home grower. It can easily and inexpensively produce high quality vegetables and fruits almost all year round, with a high level of automation.

Here's how hydroponic vertical growth works. The roots grow down through a cup. The nutrient solution is pumped into the cell medium, floods the root zone for a short time, and is then allowed to drain back into the reservoir. A consistent power supply is critical, since all systems require electrical power (to run water or air pumps). With strict control and automation of the processes, they become almost user-independent and fail-proof.

Given that each stage of the process, as well as nutrient content, can be controlled and modified, the product allows for the cultivation of over a dozen different crops of notably different vegetative regimes and temperature, humidity level and lightening hours requirements. Each regime, for each crop is pre-programmed, providing the most efficient use of water and nutrients. Customers can select and vary regimes easily through smart devices.

There is no need for additional weeding and cultivation. The user's main responsibilities are planting and harvesting.

Fresh water, fetched into the appliance reservoir, is then mixed with nutrients and feeds the plants for a week. Nutrients are one of the basic elements of any hydroponic system.

To be incorporated, fertilizers must be soluble in water. Otherwise, they are outside the plant's access. Hydroponics systems give the grower complete control over the use of fertilizers, their type and concentration.

With the help of a nutrient meter, the grower has also the ability to fully monitor and maintain a relative consistency throughout the process. Nutrient composition is key for the process. Manual mixing can be quite difficult, since there are over twenty elements needed for plant growth.

The basic elements, carbon, hydrogen and oxygen, are absorbed from air and water. The rest of the elements, called mineral nutrients, are dissolved in the nutrient solution and require are needed in specific proportions. Any good hydroponic nutrient solution must contain all of these elements: Nitrogen (N), Potassium (K), Phosphorous (P), Calcium (Ca), Magnesium (Mg), Sulphur (S), Iron (Fe), Manganese (Mn), Copper (Cu), Zinc (Zn), Molybdenum (Mo), Boron (B), Chlorine (Cl).

For the most part, this is taken care of with any pre-formulated commercial hydroponic nutrients. Often, these pre-made nutrients come in one, two, three or even more “parts” so the grower can change the ratio of the mineral elements to allow for either vegetables, fruits or flowers to grow, and for different crops.

LED lights are revolutionizing plant cultivation, offering numerous advantages like growth stimulation, energetic efficiency, adjustable wavelengths, and many others. The primary benefit of LED over the more common light sources is a significantly reduced heat and power consumption.

Producing less heat, LEDs are more efficient and require significantly less ventilation and cooling.

Light color is also of great importance, as it will influence the plants' well being. For instance, natural light is the best for seedlings that are just beginning to grow. But its importance goes well beyond this.

Plants are mostly green because of chlorophyll. A pigment found in leaves that allow them to make the most out of red and blue light, the both ends of the spectrum. Plants also possess carotenes and xanthophylls, other pigments that help it use green light in photosynthesis. These las pigments, however, are less common, as you can see in the green coloration of most leaves. Being green, leaves reflect this color.

Knowing this, the length of light waves at 430-460nm and 630-660nm has been estimated to be ideal for the photosynthetic process, fostering growth. The first margin corresponds to blue light. The second, to red light.

The benefit of blue light (wavelength 430-460nm) is that chlorophyll a, b can absorb more energy. Chlorophyll stimulates the production of light even more. Acceleration of growth of the stem helps stem strength and reduces stem elongation, this yields strong and fresh green leaves. Red light (wavelength 630-660nm) waves lets Chlorophyll a, b speed up the flowers nourishment and brings the fruit to perfection faster. Maximizing the root growth gives strong roots, which accelerate the growth of the stem.

In general, these are the ranges of light that photosynthetic organisms can use for photosynthesis. Some light outside of this parts of the spectrum can also be used to mimic more 'Spring' or 'Autumn' light, which further stimulates growth under adequate circumstances.

MARKET ANALYSIS

Intro

The Cannabis plant has been used for thousands of years by many cultures, for medical and spiritual purposes, but also for recreational uses. For example, a bag of Cannabis has been found in a shaman's grave in China, dated more than 2700 years old. This and other facts point to Asia as Cannabis' natural origins.

The Greek historian Herodotus mentions the plant being used by Scythians in cannabis steam baths and thus gives us the first written record of Cannabis use at around 440 BC. Up until the beginning of the 20th century, the plant has been considered as socially acceptable in many cultures, especially when used for religious and spiritual ceremonies.

A common form of 'decriminalization', now practiced in some countries, such as the US, Australia and Europe, is using fines to punish users. This retains the presumed advantage of withholding state approval while reducing social costs and the legal consequences of criminal convictions.

Canada

Legal situation

In 1923, when cannabis was outlawed in Canada, few people had ever seen it or heard of marijuana. Opium and cocaine had been outlawed some years before, and no further debate was needed to include cannabis among banned narcotics. Nearly 10 years passed before the first arrests for Cannabis possession were reported. Thus, this early legislation has been called by some observers: "the making of a law without a problem."¹

Until the 1960s, marijuana use was rarely encountered in the mainstream population. Since then, its popularity and use began to increase among educated, affluent, white, young people with good social status, thus taking Cannabis from the fringes of society to its very core.

¹ Giffen, P.J., Endicott, S.J. & Lambert, S. (1991). Panic and indifference: The politics of Canada's drug laws. Ottawa: Canadian Centre on Substance Abuse.

Enforcing prohibition has become a difficult problem because of general disregard for it. This is why the Le Dain Commission recommended removing criminal penalties for cannabis possession. However, despite the drug's low toxicity and low potential for abuse, the commission did not propose that it be legalized. They still preferred measures that would discourage young people from taking up the habit.

In 2017, however, a law was passed that set on track the complete legalisation of Cannabis in Canada. In all legal marijuana states, the consumption of cannabis is permitted for patients who have obtained recommendations from medical physicians for qualifying medical conditions. Colorado and Washington State, in the US, additionally allow for all adults (21 years and older) to purchase and consume cannabis within certain limitations. Starting on July 2018 recreational use will be allowed.

Economics

A legal market for recreational marijuana could give Canada's economy a boost of up to \$22.6 billion annually, says a new study from business services firm Deloitte. The study estimates that marijuana sales, even initially, would be at least as large as hard liquor sales in Canada, at around \$5 billion annually, but could be as large as \$8.7 billion, making them as large as wine sales.

The total impact for Canada's economy of legal cannabis market — including growing and distribution, pot paraphernalia, increased tourism and business taxes — would amount to between \$12.7 billion to \$22.6 billion annually.

The Canadian marijuana market is expected to grow fast in the coming years: it is still well under-penetrated, leaving room for significant growth and potential new entrants. Mackie Research Capital Corporation forecasts the peak Canadian marijuana market size to be over \$2.2B in 2020, assuming full legalization down the road (over \$1B in 2020 without full

legalization) - some of these sales are being cannibalized by the black market via dispensaries. Their marijuana model assumes that the Canadian market would follow a similar growth trajectory and market penetration trend as has occurred in Colorado and Oregon.

Unlike the US, Canaccord Genuity estimates the combined recreational and medical markets in Canada could require 575 metric tons by 2021. Neil Closner, the CEO of regional marijuana producer MedReleaf Corp., has said demand could total 1,000 metric tons. The problem, he said in an interview on BNN, is that producers weren't growing enough marijuana. "If you add up all of the announcements from all of the licensed producers to date in terms of their expected capacity growth over the next year, you're only hitting at about half of their total demand," Closner said. A chief economist at CIBC World Markets states that Canadians could be buying as much as \$2 billion worth of marijuana products a year.

These findings are conservative, and show less enthusiasm for marijuana than some other studies. Deloitte, for example, published a report last year that found 22 percent of adult Canadians use marijuana at least some of the time. Based on that number, Deloitte estimates the base retail market value of recreational marijuana could be up to \$2.7 billion by 2021. Another market research firm, the Brightfield Group¹, predicts an international market size of up to \$31 billion by 2020.

USA

The moment of cannabis legalization for medical and recreational use in 2012 became a milestone of a steady marijuana demand formulated by Americans. The net result is that, in many states, a clear picture of what a fully functioning cannabis market looks like has not yet been able to emerge. Despite some considerable debates and unexpected inconveniences, a continuing trend of rising consumption had been detected since this date. Most of the sale forecasts conducted in 2012-2013

just underestimated actual sales levels significantly. The dissimilarity between real and planned sales is still rapidly rising: \$4.3 billions estimated and \$6.7 billions of actual sales in 2016. Growth is being fueled by the rising popularity of

1 Giffen, P.J., Endicott, S.J. & Lambert, S. (1991). Panic and indifference: The politics of Canada's drug laws. Ottawa: Canadian Centre on Substance Abuse.

marijuana-infused concentrates and edibles. But what's not included in these numbers are the billions being generated by indirect industries that are also profiting from the cannabis boom, including those that sell accessories, machinery and equipment, pesticides and real estate.

Source: Based on information from the National Conference of State Legislatures (NCSL) as of 12 May 2017, retrieved at https://www.unodc.org/wdr2017/field/Booklet_3_Plantbased_drugs.pdf

Conclusion

ATF appliances are one of the most favorable solutions for regular Cannabis consumers who do not require discretion cultivation and weeding or any kind of license in Canada. “Grow up to 4 cannabis plants, up to a maximum height of 100cm, per residence, for personal use from licensed seed or seedlings”.

However, the product functionality is not limited to cannabis cultivation. ATF is a multicrop grower which that can be used to grow cucumbers, tomatoes, peppers, strawberries, and many others. The vegetation scheme programmed in an appliance might be easily switched from cannabis to peppers and back again. Nevertheless, for our expansion we see that the main ATF target audience is located predominantly in USA and Canada.

ATF Growers are ideally adjusted for automatic cannabis growing. Nowadays, the Cannabis demand emerging in several countries like the USA and Canada is booming rapidly. Despite significant efforts taken by national marijuana producers, there is a substantial shortage of the effective indoor growers meeting customers' wishes.

Several large manufacturers will not be able to accommodate for the existing demand due to overloaded capacities. Thus, there is a perfect opportunity to the increasing needs in organic products and an evident demand for all kinds of appliances related to a particular crop growing process.

The key target markets for cannabis cultivation are located in Canada and USA through a wide national legalization campaign run by the national governments.

For example, California will include a 15% levy on all cannabis sales in the state, including medical pot products, starting in January 2018. Meanwhile, local governments are also adding taxes for sellers and growers that could result in a 70% increase in the price of a small bag of good quality marijuana in parts of the state.

Between state and local taxes, some buyers will see an effective tax as high as 45% on adult-use cannabis.

The potentially high price of retail marijuana, however, leaves frequent recreational users in a bind. To escape price increases, they could grow their own pot at home, but that's a time-consuming and harder-than-it-looks process.

The ATF Home Grower, at this point, emerges as a simple solution to the problem. It simplifies the cultivation process for the average consumer, allowing for easy and efficient self-growing. According to most researches, there is a visible trend in recreational marijuana sales, clearly on the rise. For entrepreneurs and investors, the marijuana industry could be a new dot-com boom.

The ATF team has several years of specialized experience in the development and production of agro appliances. The market conditions and change of regulation offer a unique opportunity that ATF can make the most of.

ATF TOKEN

ATF is the first token that allows the blockchain community to have easy access to advanced technologies in automated agro cultivation equipment manufacturing.

One of our primary goals is to provide people who trust in our product and share our vision with interesting incentives. We developed a transparent reward scheme reaping financial reward for our investors and bringing advantage to ATF token holders. The main advantages are reflected in the list below.

- 10 ATF tokens may be used as a voucher to purchase a single ATF Home Grower with 250 USD discount and priority, valid from the official sales start
- ATF tokens will be listed on the leading crypto exchanges and repurchased by the issuer from the open market. The number of tokens repurchased will be at least 35 % of profits for each year. We will not announce when we repurchase them in order not to influence the price, but the number of tokens in our account will be visible on the blockchain.
- At a later stage the company reserves the right to exchange ATF tokens for shares in the company in case of an IPO. The number of shares allocated to token holders will be 30 % of the company shares.
- ATF token is backed by tangible industrial assets of the enterprise located in Canada.
- ATF project is implemented by an experienced project team focused on advanced agricultural appliances development for various crops cultivation
- ATF is a transparent business in a sustainable growing market.
- The project raises funds for the launch of the mass production of the ATF Home Grower - a product for the cannabis and plant cultivation market, one of the fastest - growing niches in the US and Canadian economies as the marijuana industry is getting supersized at the moment.

One of the main ICO goals is to ensure the independence of the ATF project and protect it from unfriendly takeovers which might be conducted by a large enterprises or companies affiliated with government structures. Funds raised through the ICO campaign significantly support corporate principles implemented by the ATF team based on independence, transparency and sustainability.

During the token sale, a minimum funding of 1' 300 000 USD is expected. The collected funds will be used to build up production in Canada and set up a professional marketing campaign. Funding above the minimum level will be allocated as operational expenditure, increasing levels of production. A more detailed explanation can be found in the Roadmap Section.

ICO

Quick facts

Token Name	Agro Tech Farm Token (ATF)
Token Price	1 ATF = 0,012 ETH
Pre ICO start date	February 16, 2018 (00:00 UTC)
Pre ICO end date	April 10, 2018 (05:00 UTC)
ICO start date	April 10, 2018 (05:00 UTC)
ICO end date	June 10, 2018 (05:00 UTC)
Token Amount	Up to 1'431'000 ATF
Hard Cap Pre ICO	500 ETH
Hard Cap ICO	10'000 ETH
Maximum tokens distributed via ICO	1'060'00 ATF
Maximum tokens Purchase	1 Wei
Maximum tokens Purchase	No limit
Eligibility	Anyone except permanent residents from Hong Kong, People's Republic of China and the US due to legal restrictions or trade sanctions.
ICO Smart Contract	Mintable

*depending on phase

Bonus & Phases

Pre-ICO stage		
Date	Bonus	Bonus price
02/16-02/24/2018	+50%	0.008 ETH
02/24-03/10/2018	+40%	0.00857 ETH
03/10-03/26/2018	+35%	0.00889 ETH
03/26-04/10/2018	+30%	0.00923 ETH
ICO stage		
Date	Bonus	Bonus price
04/10-04/16/2018	+20%	0.010 ETH
04/17-04/23/2018	+15%	0.01043 ETH
04/24-04/30/2018	+10%	0.01091 ETH
05/01-05/09/2018	+5%	0.01143 ETH

ROADMAP

This section presents three different scenarios. These vary depending on the amount of money raised. Irrespectively of scenarios, our plan involves 3 phases. The money will be used solely for the expansion of the business to North America. This expansion is based on three factors: the building of production facilities in Canada, the hiring of a local workforce and adequate marketing.

The opportunity that the north american markets represent simply must not be missed. ATF is the right team in the right times. All that is needed is to be at the right place.

As with any plan, any of these is subject to corrections after the actual sales. The model will be updated to make the most of funds collected. These three scenarios should give the investor an idea of how the funds will be used, bearing in mind that they are not unmovable.

1

Scenario 1: up to \$1,5 million are raised

In the event of a collection of \$1,500,000 we will start the production of installations in Canada, but with this budget we will use leased premises, since most of the production processes outsourced to partner companies. This will allow us to launch the project but it will increase the payback period and reduce profitability.

2

Scenario 2: up to \$4,5 million are raised

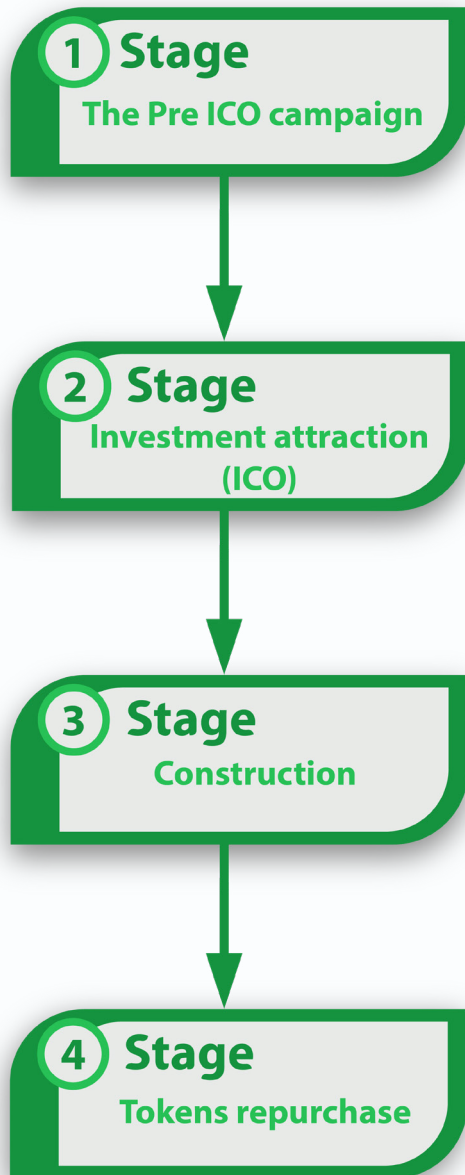

In the event of a collection of \$4,500,000 USD, we will start production in Canada, with an opportunity to purchase our own equipment and a suitable industrial facility. The project will develop according to our forecasts.

3

Scenario 3: up to \$10 million are raised

In the event of a collection of \$10,000,000, we will be able to increase the capacity of our production and the number of manufactured equipment, using owned equipment and real estate. Having an increased marketing budget, we will be able to quickly take the leading place in both the American and Canadian markets. Also, an investment of this level will allow us to engage in additional developments and expand the product line. Furthermore, we will be able to produce equipment for different types of crops of different sizes for a larger number of consumers. In this case, the projected revenue of the company will increase several times, with a much higher impact.

STAGES

1. The Pre ICO campaign

February

2. Investment attraction (ICO)

February-June 2018

3. Construction

May – July 2018.

Purchase land plot in a industrial zone in Canada. Designing and obtaining permissive documentation.

July– August 2018.

Construction of production facilities and industrial factory equipment installation

August – September 2018.

Commissioning of industrial equipment and pre-launch activities

October 2018.

National sales start in Canada

November 2018.

National sales start in USA.

4. Tokens repurchase

All information related to buyback activities at the open market within -number of ATF tokens planned to be repurchased, buyback premiums, certain regular intervals can be found in the ATF token section. Scheduled bonuses distribution will be posted on the corporate website and will be sent via ETH to ATF token holders.

* In order to comply with the principles of openness and transparency during all stages of the project's implementation, an online broadcast will inform on the progress of construction of the industrial plant using cameras. The cameras will be located on the territory of the construction site, later on at the factory itself, allowing for a complete supervision by investors.

Example based on \$4,5 mil raised

Average production level a year	1200 units a month
Payback period	7-8 months
1st year estimated revenue	20 366 500 USD
2nd year estimated revenue	46 368 000 USD
Profitability index	23-26%
1st year estimated net income	2 464 373 USD
2nd year estimated net income	12 055 680 USD
NPV	40 534 320 USD
Production deployment	5 months (April-August 2018)

OUR TEAM

Ilya Tsigvintsev

FOUNDER & CEO

Moscow International Business School.
Economist.

The founder of AgroTechFarm. Organized the development and launch of the production of the ATF product. He organized the production of micro-cultivation. Experience in business is 15 years. He was engaged in the sale of construction equipment, production of building materials, founded a company for the installation of video equipment, was engaged in tender supplies for state enterprises.

Alexander Basov

CO-FOUNDER & CEO

The Ural State University.
Social Management

Co-founder of AgroTechFarm. He is engaged in analytical and marketing issues, organizes business processes, strategic development of ATF. Experience in business for 10 years, opened a courier delivery company, an advertising agency - a printing house.

KRILL SMIRNOV

Agro technology

Specialist in organic farming. More than 5 years own production of organic substrates. In the company he holds the post of technologist, the main task is the introduction of humic substances into hydroponic systems.

ALEXEY KOVNER-CHUK

Technical Engineer

Developed an algorithm for controlling the microclimate and nutrient solution.

Engineer-designer, specializing in automation of technological processes of growing plants with modern methods. Experience in plant growing for more than 5 years, there is a patent.

ELENA MAKHLINA

Agriculturist

She took part in the scientific research institute of the Urals State University as a scientific employee, 2015.

She was engaged in the selection of optimal conditions for the cultivation of different crops. Conducted scientific research for various new varieties of plants.

ALEXANDER ORLOV

Industrial Designer

An Industrial Designer. Created all types of possible modifications and additions in the existing designs to enhance product efficiency.

ELENA SHEROMOVA

Economist

Jurisprudence. Advocate. Legal and economic issues.

SERGEY MOSOLOV

IT

Specialization in the field of enterprise management systems, client-server applications in UNIX environments. Work experience more than 20 years.

PURCHASER INFORMATION

By participating in presale or crowd sale, the Purchaser agrees to the above & in particular, they represent and warrant that

- the Purchaser have read carefully the terms & conditions attached to the white paper.
- agree with the content and accept to be legally bound by them.
- are authorized and have full power to purchase ATF tokens according to the laws that apply in their jurisdiction.
- neither US citizen nor resident.
- will not use the presale or crowd sale for any illegal activity, including but not limited to money laundering & the financing of terrorism.

APPLICABLE LAW

The agreement shall be governed in all respects by the laws of Cyprus. Each of the parties irrevocably consents to the exclusive personal jurisdiction of the federal & state courts located in Cyprus, as applicable, for any matter arising out of or relating to this agreement, except that in actions seeking to enforce any order or any judgment of such federal or state courts, such personal jurisdiction shall be nonexclusive.

LEGAL ISSUES

ATF tokens should under no circumstances be considered as a security in any form. The tokens obtained during the presale, crowd sale or crypto currency exchanges are not shares and they do not give any ownership right or stake in ATF Canada nor its current or future brand product. Any individual participating in ATF token presale or crowd sale confirms he/she has reviewed this white paper fully realizes the risks, costs and benefits associated with the purchase of these tokens. ATF Canada is not a financial intermediary according to the Canadian law and is not required to obtain any authorization of Anti Money Laundering purposes.
